Training Sahil: trainer's cheat sheet

Friday 9 October · about 45 minutes · on Sahil's own phone, app in English

PITA BROS

For Tushar

GOAL FOR TODAY

Sahil places the day's order alone — count, fill, explain, submit — and knows how to confirm a delivery and do a stock count.

REPEAT THESE ALL SESSION

1. **Count first,** type second.
2. **Submit before the deadline** in the grey strip.
3. **Red card:** check the number, then give the honest reason.
4. **Blank = skip.** 0 = deliberately none.
5. **Submit goes to the Manager,** not to the supplier.
6. **Every delivery:** Confirm receipt + WZ photo.

BEFORE YOU START

- [ ] Sahil has read the 2-page pre-work.
- [ ] Sahil's **own phone**, charged and online.
- [ ] Wola code ready — dictate it, don't write it down.
- [ ] A **real order** to do together: Bukat or Intermlecz before **17:00** → delivered **Saturday**.
- [ ] Today's Bukat / Intermlecz not submitted yet — no duplicates.
- [ ] This sheet and a pen for the sign-off on page 2.

AGENDA · 45 MIN

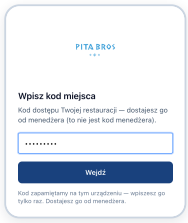

1	2	3	4	5	6	7	8
3′	5′	10′	5′	5′	5′	7′	5′
Log in	Order screen	Count & fill the card	Reasons	Submit	Delivery	Stock count	Quiz

1 Log in and switch to English — 3 MIN

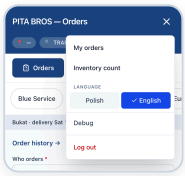

SAY
- It's a web page, nothing to install. Type the Wola code, tap **Wejdź** — the phone remembers it.
- ≡ → **Language** → **English**. Same menu: **My orders**, **Inventory count**, **Log out**.

DO Sahil logs in on their own phone. Optional: add the page to the home screen.

CHECK Sahil logs out and back in without help.

Login (Polish)

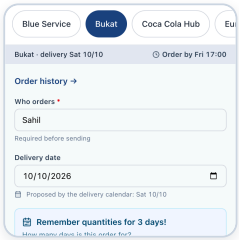

≡ menu

2 Read the order screen — 5 MIN

SAY
- Top row = suppliers; swipe sideways for more.
- The grey strip is your deadline: delivery day + **Order by … 17:00**.
- **Who orders** = your full name. **Delivery date** comes from the calendar — leave it as it is.
- Thursday, Bukat and Intermlecz: pick **for 3 days** and add the extra days yourself — the suggestion doesn't.

CHECK Sahil reads out the delivery day and deadline for Bukat and Intermlecz.

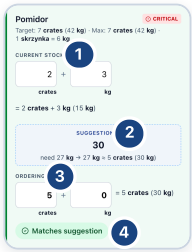

Top of the order screen

3 Count, then fill the card — 10 MIN

SAY
- Count first, type second. ① **Current stock** = on the shelf now; pack products have two boxes (packs + loose).
- ② **Suggestion** = what's missing to reach the target. Tap it to copy it into ③ **Ordering** (supplier's unit: crates, cartons…).
- Not ordering it? Leave Ordering **blank**. 0 means "deliberately none".

DO Count 4–5 real products together; Sahil types them in.

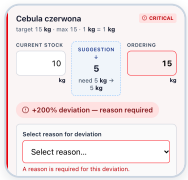

CHECK Sahil explains one card: target − stock = need → rounded to the supplier's unit. ④ green = matches.

4 Deviations and reasons — 5 MIN

SAY
- More than 25% from the suggestion → card turns **red**. Check the number (typo? unit?); if it's right, pick the honest reason → **orange**.
- CRITICAL items: below the suggestion always needs a reason. **Other reason** needs a comment.
- **Bulk reason** puts one reason on every red card — only when it fits all of them.

DO Sahil types a big number on purpose, picks a reason, then puts the right number back.

Red: reason needed

Orange: given

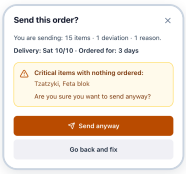

5 Submit and follow up 5 MIN

SAY

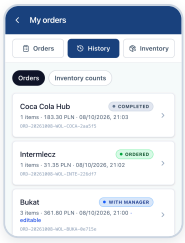

- The bottom bar says what's missing. When it says **Ready to submit**, tap **Submit**.
- Read the **Send this order?** box — especially "Critical items with nothing ordered".
- It goes to the **Manager**, who checks it and sends it to the supplier.
- History: **With manager** editable · **Ordered** sent · **Completed** delivered. "changed by manager (was 5)" = the Manager corrected a line.

DO Submit the real Bukat or Intermlecz order before 17:00. Already sent today? Stop at the dialog and tap **Go back and fix**.

CHECK Sahil finds the order in History as With manager.

Send this order?

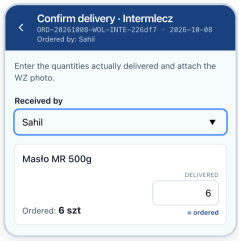

History

6 Confirm a delivery 5 MIN

SAY

- Delivery arrived → History → the **Ordered** order → **Confirm delivery**.
- Delivered is pre-filled with what was ordered — change only what's different. **Received by** = your name.
- Photo of the WZ. Black camera screen? Take it with the phone camera, then **From gallery**.
- **Confirm receipt** is final — no edits afterwards.

DO Open an Ordered order and walk the screen. Tap Confirm receipt only if that delivery is really here.

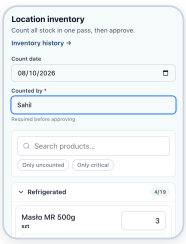

Confirm delivery

7 Stock count 7 MIN

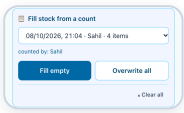

SAY

- ≡ → **Inventory count**. Count date + **Counted by** (your name).
- Blank = not counted · 0 = nothing on hand.
- Interrupted? **Save draft**. Finished? **Approve**.
- On the next order: **Fill stock from a count** → **Fill empty** copies the counted numbers into Current stock. Check them — nothing is filled automatically.

DO Count one real category (e.g. Refrigerated) and approve it, then show Fill empty on the order screen.

Inventory count

Fill from a count

8 · Quick quiz 5 min, no app

1. Where is the deadline?
   Grey strip under the suppliers: "Order by … 17:00".
2. A card is red. What first?
   Check the number. If it's right, pick the reason.
3. Blank or 0 in Ordering?
   Blank = not ordering. 0 = deliberately none (may ask for a reason).
4. Wrong quantity after Submit?
   Edit while With manager. Locked or Ordered → message Marek.
5. The delivery is here. Steps?
   Check it, Received by, WZ photo, Confirm receipt.
6. Thursday Bukat order?
   Order for 3 days — add the extra days yourself.

Common mistakes → fix

SAHIL SEES / DOES	FIX
Submit stays grey	Read the bottom bar: no name, a red card, or no quantity.
"Nothing to order today"	Ignore it — it shows until quantities are typed.
Typed 0, meant to skip	Clear the field — blank = skip.
App in Polish	≡ → Language → English (per phone).
Draft lost name / date	Drafts keep quantities only, on this phone.
Black camera (WZ)	Phone camera first, then From gallery.
Product not in the list	**+ add product**, then tell Ben.

SIGN-OFF — TICK WHEN SAHIL DID IT ALONE

- ☐ Logged in and set English
- ☐ Read the delivery day and deadline
- ☐ Filled cards from a real count
- ☐ Fixed a red card with a reason
- ☐ Submitted and found it in History
- ☐ Walked through Confirm delivery + WZ
- ☐ Did a stock count + Fill empty
- ☐ Answered the quiz

Marek · Manager
Orders, quantities, deliveries, anything already sent.

Ben · the app
Errors, login, a missing product. Send a screenshot + what you tapped.
